If you don't think this poison doesn't work and i'm talking about people who work in the healthcare system well you know its garbage and you and the nation is exactly right Don't take it for real another example of their bullsh!t so with much love and so much respect shalom nation.

They didn't want to reveal his reasons for why he believed the drugs were harmful, but were willing to "paint a picture of a troubled individual." Obviously, his reasons may have been credible, otherwise they would have used it in helping them paint him as a "troubled individual."

Shelom Sister Lisa when I first heard this story I was happy I'm not going to lie. I pray that he finds favor and grace with TMH. This man lost his way to support his family and himself by saving others. I agree Sister Lisa it does say a lot if you see healthcare workers going against the grain and I'm definitely taking heed and keeping watch. Thank you for all you do Queen!

Lisa, I know what you mean that someone in healthcare is telling us they don't believe in the vaccine , but this guy is crazy . He is not even trustworthy so we can't look to him for any serious guidance on this issue. I'm not saying it's insignificant 100%, if other pharmacist start doing this maybe it's an issue, but right now I'm just looking at a nut job whd's on his job and did something to get attention.

He is actually a True Healthcare professional becuz their job is patient safety and survival, even if that goes against mainstream genocide. I mean mainstream society (wink). In summation, we need more like him in this respect.

It's strange the vaccine is ineffective if left at room temperature, yet when injected in the body it is being "stored" in a vessel at 98.6 degrees.....I don't believe anything they say.

If these vaccines were really safe and effective, won't don't they give the so-called vaccines to covid-19 patients. I believe that would make more sense. give to the individuals most at risk. There is absolutely no telling what is in these vaccines.

I feel like he would confess it's not like anything is gonna happen to this bastard, he also could be a conspiracy-theorist – so he might be crazy! (Over emotional)😂
So he got a lot of nerve, and not only that, hell be given employment, at another pharmacy – Wisconsin or Arizona! Dirty low-down bastard and I bet he's short 11oo - white privilege I don't buy this guy, he might have other motivations than caring about if the vaccine was okay for public consumption!
He's a pharmacist he ain't an MD!

Uhmm, reckless endangerment and a fine should be issued against those who do not wear masks in public too. This guy did not dispose of the vaccines he just left them out in an attempt, to reduce the level of harm they might cause for those vaccinated. Yeh, for him.

If the vaccine gets spoiled after 24 hrs, then the vaccines are TRUELY unsafe. Even milk takes 30 hours to spoil.
